Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2011 Final Report

Date: September 04, 2018

Program or Project Title: Reinvest in Minnesota Wetlands Reserve Program Partnership, Phase 3

Funds Recommended: \$13,000,000

Manager's Name: Kevin Lines

Organization: BWSR

Address: 520 Lafayette Road North

City: St. Paul, 55155

Office Number: 651-297-1894 Email: kevin.lines@state.mn.us

Legislative Citation: ML 2011, First Sp. Session, Ch. 6, Art. 1, Sec. 2, Subd. 4(a)

Appropriation Language: \$13,000,000 the first year is to the Board of Water and Soil Resources to acquire permanent conservation easements and restore wetlands and associated upland habitat in cooperation with the United States Department of Agriculture Wetlands Reserve Program. A list of proposed land acquisitions must be provided as part of the required accomplishment plan. The accomplishment plan must include an easement monitoring and enforcement plan. Up to \$112,000 is for establishing a monitoring and enforcement fund as approved in the accomplishment plan and subject to subdivision 15. An annual financial report is required for any monitoring and enforcement fund established, including expenditures from the fund and a description of monitoring and enforcement activities.

County Locations: Becker, Blue Earth, Clay, Dodge, Douglas, Freeborn, Grant, Kandiyohi, Le Sueur, Lyon, Marshall, Martin, McLeod, Nicollet, Nobles, Norman, Pennington, Pope, Rice, Roseau, Stearns, Steele, Traverse, West Ottertail, Wilkin, Wright, and Yellow Medicine.

Regions in which work was completed:

- Northern Forest
- Forest / Prairie Transition
- Prairie
- Metro / Urban

Activity types:

• Protect in Easement

Priority resources addressed by activity:

- Wetlands
- Forest
- Prairie

Summary of Accomplishments:

The RIM-WRP Partnership permanently protected 5,559 acres of priority wetlands and associated upland native grassland wildlife habitat via perpetual conservation easements on 60 sites and leveraged over \$11 million of federal Wetlands Reserve Program funds.

Process & Methods:

The Reinvest in Minnesota (RIM) -Wetlands Reserve Program (WRP) Partnership accelerated the restoration and protection of approximately 6,000 acres of previously drained wetlands and associated upland native grassland wildlife habitat complexes via permanent conservation easements. The goal of the RIM-WRP Partnership was to achieve the greatest wetland functions and values, while optimizing wildlife habitat on every acre enrolled in the partnership.

The RIM-WRP partnership combined Minnesota's RIM Reserve conservation easement program and the United States Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) Wetlands Reserve Program (WRP). Combining RIM Reserve and WRP allowed OHF to leverage Federal Farm Bill conservation dollars to Minnesota. Utilizing both programs resulted in competitive payment rates to landowners and sharing of the costs associated with perpetual easement acquisition and restoration by both the federal and state programs.

The RIM-WRP Partnership held one to two joint meetings per year to provide program oversight and guidance and to establish payment rates for upcoming sign-ups. Specifically, the RIM-WRP Partnership used the USFWS Habitat and Population Evaluation Team (HAPET), located in Fergus Falls, to develop a GIS Wildlife Habitat Potential Model that was used with the WRP and RIM Reserve programs' environmental evaluation. In addition, the RIM-WRP Partnership developed the Minnesota Wetland Restoration Evaluation Worksheet which was used to evaluate each easement application on its potential to restore wetland functions and values along with optimum wildlife habitat benefits.

RIM-WRP was offered statewide but had a priority focus in the ecological provinces of the state that have experienced significant losses of wetland and associated prairies. It was delivered by local NRCS staff, local Soil and Water Conservation District (SWCD) staff and assisted by program staff from both NRCS and the Board of Water andSoil Resources (BWSR). Since the SWCD is responsible for the local delivery of the RIM Reserve program to private landowners on behalf of the State of Minnesota, they were ideally suited to work in concert with their local NRCS staff to efficiently and effectively deliver the RIM-WRP partnership. Once an easement is acquired NRCS is responsible for maintenance, inspection and monitoring during the life of their 30-year WRP easement. The state of Minnesota assumes sole responsibility via its RIM Reserve easement once the 30-year WRP easement has expired. BWSR partners with local SWCDs to carry-out oversight, monitoring and inspection of its conservation easements.

The RIM-WRP Partnership demonstrated that the State of Minnesota can cooperatively work with a federal partner (NRCS) and through a local delivery system (SWCD, NRCS, and DU) to implement a permanent easement protection program that yielded thousands of acres of permanently protected wildlife habitat. Significant leverage obtained was due to the amount of easement payments, conservation plan payments, and other costs the NRCS contributed to this partnership. The NRCS made the bulk of the easement payment portion through 30-year WRP Easement acquisition, while BWSR paid an additional portion for the Permanent RIM Easement.

NRCS paid a high percentage of the restoration costs for these easements, with RIM picking up the remaining costs. The use of NRCS Practice Standards, along with BWSR's Native Vegetation Guidelines led to very high diversity mixes being seeded. The level of wetland restoration was dependent on restorable extent that would not impact lands outside the easement area. BWSR & NRCS evaluated restoration extent during our scoring review to ensure restoration was actually feasible, then followed up with site analysis and surveys.

We enrolled 60 permanent conservation easements totaling 5,559 acres of wetland grassland wildlife habitat complexes. These restored wetlands and native grassland complexes will provide critical habitat for migratory waterfowl and other wetland dependent wildlife species in Minnesota. Wetlands and adjacent grasslands provide habitat for waterfowl, pheasants, deer and non-game species, some that are threatened or endangered.

As of 8/21/18 42 easements have been restored and 18 are in the restoration process. BWSR and the NRCS are committed to seeing all restorations through to ensure all sites provide beneficial habitat. Due to delays with easement processing, restoration was also delayed in several cases. BWSR is held to the statutory requirement that requires restoration of the easements we acquire. This restoration includes establishment of acceptable vegetation, if the current cover does not adequately meet site goals.

Note that due to LSOHC database architecture and migration of this old project into the "new" LSOHC database amended goals are not reflected in the "original" budget and output columns of this final report.

Explain Partners, Supporters, & Opposition:

Delivery of this program was a coordinated approach that brought together Minnesota BWSR, Minnesota NRCS, local Soil & Water Conservation Districts, Ducks Unlimited, and Farm Bill Assistance Partnership Staff, as well as other key conservation partners interested in private land conservation.

Additional Comments:

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

A number of challenges plagued this and future phases of RIM-WRP. Runaway land and crop prices between the time this phase was proposed and it was implemented resulted in significantly fewer acres protected. Staffing and other issues at NRCS severely limited the agencies ability to close easements and implement restorations. As of this writing we are still dealing with the latter challenges but are making progress. All easements have been closed and 2/3 have been restored. The remainder are in the process of restoration. BWSR is fully committed to 100% restoration of high quality wetland and grassland habitat.

Other Funds Received:

• Environmental and Natural Resource Trust Fund

How were the funds used to advanced the program:

The Farm Bill Assistance Partnership with BWSR, DNR, PF, NRCS and SWCDs as primary partners, provided funding to SWCDs to utilize technicians to promote the conservation provisions of the Federal Farm Bill and other conservation program opportunities to private landowners. The Environmental and Natural Resources Trust Fund (ENRTF) via LCCMR recommendations provided a portion of this funding.

What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Once a RIM easement is acquired, BWSR is responsible for inspection and monitoring into perpetuity. The BWSR partners with local SWCDs to carry-out oversight, monitoring and inspection of its conservation easements. Easements are inspected for the first five consecutive years beginning in the year after the easement is recorded. Thereafter, on-site inspections are performed every three years and compliance checks are performed in the other two years. SWCDs report to BWSR on each site inspection conducted and partners' staff document findings. A non-compliance procedure is implemented when potential violations or problems are identified. The amount listed for Easement Stewardship covers a portion of costs of the SWCD regular monitoring, BWSR oversight, and enforcement.

Outcomes:

The original accomplishment plan stated the program would

Programs in the northern forest region:

Not Listed

How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat availability within a certain region are expected to increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game and nongame species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored.

Programs in forest-prairie transition region:

• Not Listed

How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat availability within a certain region are expected to increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game and nongame species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored.

Programs in metropolitan urbanizing region:

• Not Listed

How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat availability within a certain region are expected to increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game and nongame species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored.

Programs in prairie region:

Not Listed

How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat availability within a certain region are expected to increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game and nongame species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored.

Budget Spreadsheet

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$13,000,000

Explain any budget challenges or successes:

Rapidly escalating land costs forced a revision of the acre goals downward (via amendment) as price per acre increased. RIM ended up by making up for a disproportionate portion of the increase as USDA was unable to. Delays in restoration, partially due to federal contract processing delays, led to increased restoration costs. We received \$11,065,000 of federal leverage through this program. All funds have been encumbered and all budget lines are reported as spent. Should any left over funds remain as the appropriation closeout occurs in the State financial system, they will be returned to the Outdoor Heritage

All revenues received by the recipient that have been generated from activities on land with money from the OHF:

Total Revenue: \$0
Revenue Spent: \$0
Revenue Balance: \$0

Λ

Explain the success/shortage of acre goals:

Rapidly rising land costs and partner delays in easement processing and restoration work drove costs higher than originally proposed. An April 2014 Amendment reduced the acre goal to approximately 6,000 acres. We met 93% of this revised goal. Due to LSOHC database architecture the ammended goals are not reflected in the "original" columns of this final report.
